an eye opening and vital account of the future of our earth and our civilisation if current rates of global warming persist by the highly acclaimed author of high tide

this book must not be ignored it really is our final warning mark lynas delivers a vital account of the future of our earth and our civilisation if current rates of global warming persist and it s only looking worse we are living in a climate emergency but how much worse could it get will civilisation collapse are we already past the point of no return what kind of future can our children expect rigorously cataloguing the very latest climate science mark lynas explores the

course we have set for earth over the next century and beyond degree by terrifying degree he charts the likely consequences of global heating and the ensuing climate catastrophe at one degree the world we are already living in vast wildfires scorch california and australia while monster hurricanes devastate coastal cities at two degrees the arctic ice cap melts away and coral reefs disappear from the tropics at three the world begins to run out of food threatening millions with starvation at four large areas of the globe are too hot for human habitation erasing entire nations and turning billions into climate refugees at five the planet is warmer than for 55 million years while at six degrees a mass extinction of unparalleled proportions sweeps the planet even raising the threat of the end of all life on earth these escalating consequences can still be avoided but time is running out we must largely stop burning fossil fuels within a decade if we are to save the coral reefs and the arctic if we fail then we risk crossing tipping points that could push global climate chaos out of humanity's control this book must not be ignored it really is our final warning

the sacramental and prophetic traditions of christian spirituality suggests matthew eggemeier possess critical resources for responding to the contemporary social crises of widespread ecological degradation and the innocent suffering of the crucified poor in a sacramental prophetic vision eggemeier maintains that the vital key for cultivating these traditions in the present is to situate these spiritualities in the context of spiritual exercises or ascetical practices that enable christians to live more deeply in the presence of god coram deo and in turn to make this presence visible in a suffering world

an expert examination of the way climate change is transforming the arctic environmentally economically and geopolitically and how the challenges of that transformation should be met a growing number of scientists estimate that there will be no summer ice in the arctic by as soon as 2013 are we approaching the end of the arctic as journalist ed struzik asked in 1992 or fully entering the age of the arctic as arctic expert oran young predicted in 1986 arctic doom arctic boom the geopolitics of climate change in the arctic looks at the uncertainty at the top of the world as the shrinking of the polar ice cap opens up new sea lanes and the vast hydrocarbon riches of the arctic seafloor to commercial development and creates environmental disasters for arctic biota and indigenous peoples arctic doom arctic boom explores the geopolitics of the arctic from a historical as well as a contemporary perspective showing how the warming of the earth is transforming our very conception of the arctic in addition to addressing economic and environmental issues the book also considers the vital strategic role of the region in our nation
