coyne s knowledge of evolutionary biology is prodigious his deployment of it as  
masterful as his touch is light richard dawkins in the current debate about creationism  
and intelligent design there is an element of the controversy that is rarely mentioned  
the evidence yet the proof of evolution by natural selection is vast varied and  
magnificent in this succinct and accessible summary of the facts supporting the  
theory of natural selection jerry a coyne dispels common misunderstandings and fears  
about evolution and clearly confirms the scientific truth that supports this amazing  
process of change weaving together the many threads of modern work in genetics  
paleontology geology molecular biology and anatomy that demonstrate the indelible  
stamp of the processes first proposed by darwin why evolution is true does not aim to  
prove creationism wrong rather by using irrefutable evidence it sets out to prove  
evolution right

human physique and behaviour has been shaped by the pressures of natural selection this is received wisdom in all scientifically informed circles currently the topic of crime is rarely touched upon in textbooks on evolution and the topic of evolution rarely even mentioned in criminology textbooks this book for the first time explores how an evolution informed criminology has clear implications for enhancing our understanding of the criminal law crime and criminal behaviour this book is directed more towards students of criminology than students of evolution it is suggested that there is scope for more collaborative work with criminologists and crime scientists exposed to darwinian thought having much to gain what is suggested is simply that such thinking provides a fresh perspective if that perspective yields only a fraction of the understanding when applied to crime as it has elsewhere in science the effort will have been worthwhile the authors attempt to provide a modest appraisal of the potential contribution that a more welcoming approach to the evolutionary perspective would make to criminology both theoretically by expanding understanding of the complexity of the origins of behaviour labelled criminal and practically where the evolutionary approach can be utilised to inform crime control policy and practice an evolutionary lens is applied to diverse criminological topics such as the origins of criminal law female crime violence and environmental factors involved in crime causation
